Education

Vellore Institute of Technology, Bhopal	Sep 2026
B.Tech. in Computer Science Engineering	CGPA: 8.27
Shree. Shivaji Science College, Amravati	May 2021
12th Grade	Percentage: 91.00%
Adarsh Secondary Schools, Amravati	May 2019
10th Grade	Percentage: 93.20%

Skills Summary

Languages & Frameworks: Python, SQL, C++ , Java, PHP.
Tools & Technologies: Version Control & Collaboration (Git, GitHub), Cloud (Google Cloud Platform (GCP), Amazon Web Services (AWS)), Databases (MySQL)
Soft Skills: Cross-functional Collaboration, Team Leadership, Agile Mindset, Operational Excellence.

Projects

R.A.K.T - Blood Bank Management System (PHP, MySQL, XAMPP, HTML, JavaScript)	Rakt.rf.gd / Github
- Designed and launched a dual-role web portal featuring an intuitive self-booking interface, boosting successful blood donor scheduling by 30% through blood type and pin code filtration for accuracy. Maintained the MySQL relational database schema, ensuring data integrity for donor records and real-time blood inventory secure CRUD operations accessible via a dedicated Admin Dashboard. - Implemented a synchronized patient location-based blood request engine leveraging optimized SQL queries for pin-code to exact hospital name and data to execute efficient matching queries and swiftly route urgent blood requests to the nearest hospitals, reducing request-to-delivery cycle time by 70% in real time - Systematized email confirmations and inventory alerts, reducing administrative follow-up tasks by 35% and boosting donor engagement by 20% during critical shortage alerts by Integrating third-party libraries (e.g., PHPMailer) to build an automated email communication service for appointment confirmations and critical inventory shortage alerts, significantly enhancing operational continuity. - Conducted on-site deployment and User Acceptance Testing (UAT) at Primary Health Center, Badnera, successfully validating end-to-end functionality, identifying edge cases, and ensuring the system met real-world operational requirements for blood donation and request workflows.	
Aushadhi - Medicine Donation System (PHP, MySQL, XAMPP, HTML, Bootstrap)	Github
- Architected a purpose-built platform to manage the lifecycle of medicine donations, from initial submission by donors to final collection. The system features a secure MySQL database to handle structured data specific to pharmaceuticals, including batch numbers, expiration dates, and prescription requirements. - Developed a multi-stage administrative workflow for the verification and approval of donated medicines; Empowering administrators to professionally vet each donation, manage collection logistics by setting pickup details, and maintain a complete audit trail of all actions. - Implemented a status-driven notification engine that automatically dispatches emails to donors at critical stages of the donation process, such as approval with collection details or rejection with a specified reason, ensuring transparent communication. - Constructed a secure user authentication system using encrypted passwords and fortified the application against SQL injection by exclusively using prepared statements for all database interactions, ensuring the integrity and confidentiality of donor and donation information.	

Achievements and Certifications

- SmartBridge** — Earned 93.90% distinction in AI with Google Cloud by building a jellyfish classifier using cloud-native MLOps, automated pipelines, and scalable deployment workflows, exceeding expectations by 12%.
- Google Cloud Arcade** — Achieved Champions Milestone and 60+ Arcade Badges on GCP via consistent study and initiative; completing an average of 5 badges weekly, which was the highest on the intern team.

Extracurricular

- Led and coordinated blood supply management for hospitals in the village, ensuring timely delivery and positively impacting the healthcare of 70+ individuals through improved access and support.
- Spearheaded financial management for the Marathi Club, overseeing the collection and allocation of a 2 Lakhs budget for the successful 2023 Ganesh Chaturthi event.
